1. About ConfigWise AR

AR Content Management for your e-commerce. Free of charge high quality AR Content of your products with Augmented Reality (app and web), to drive sales and reduce returns. More information you can read at the page -

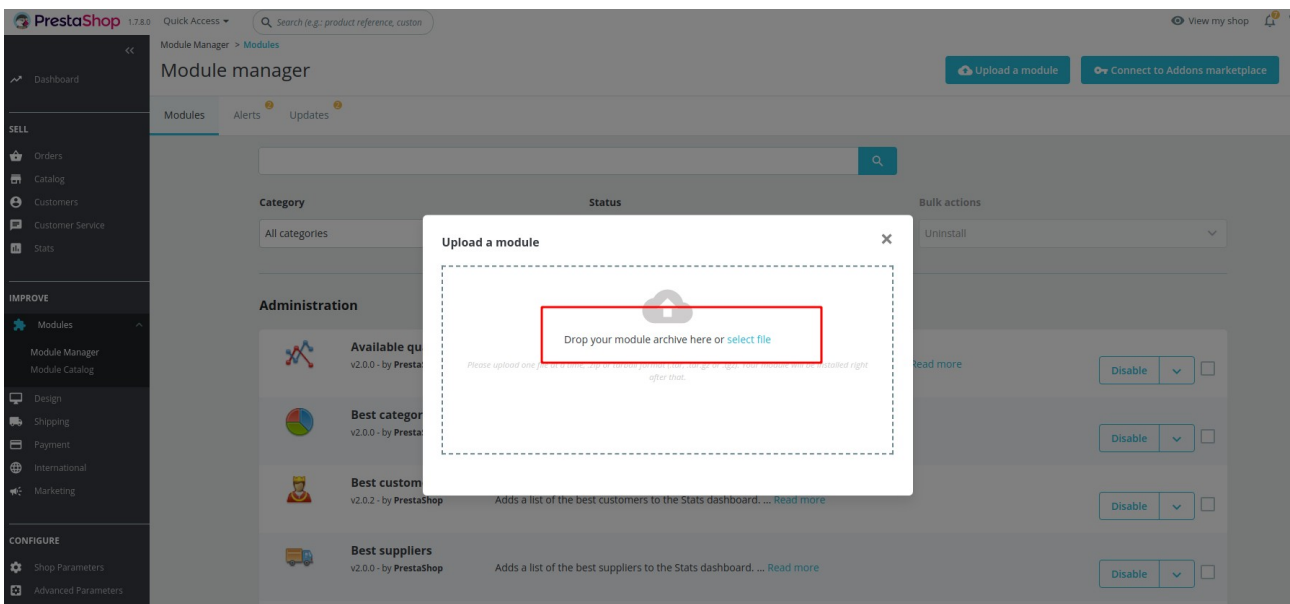

<https://www.configwise.io/>

2. Installation

For installation the module need to go to administration page of CMS Prestashop: IMPROVE > Modules > Module Catalog

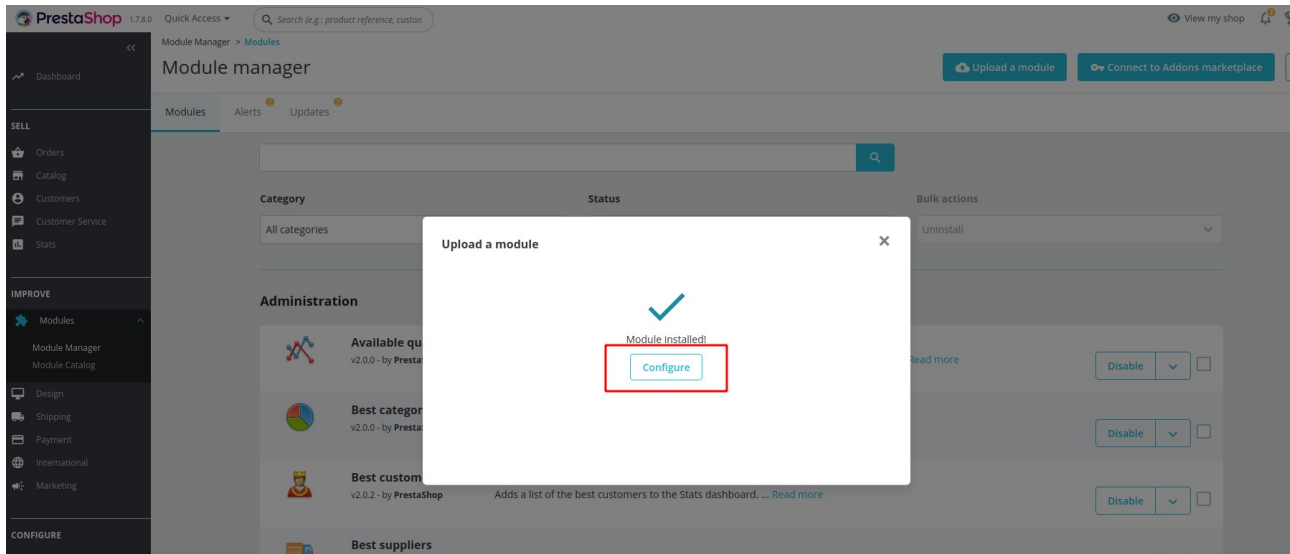

and click on Upload a module button like on the screenshot above. After then you will see:

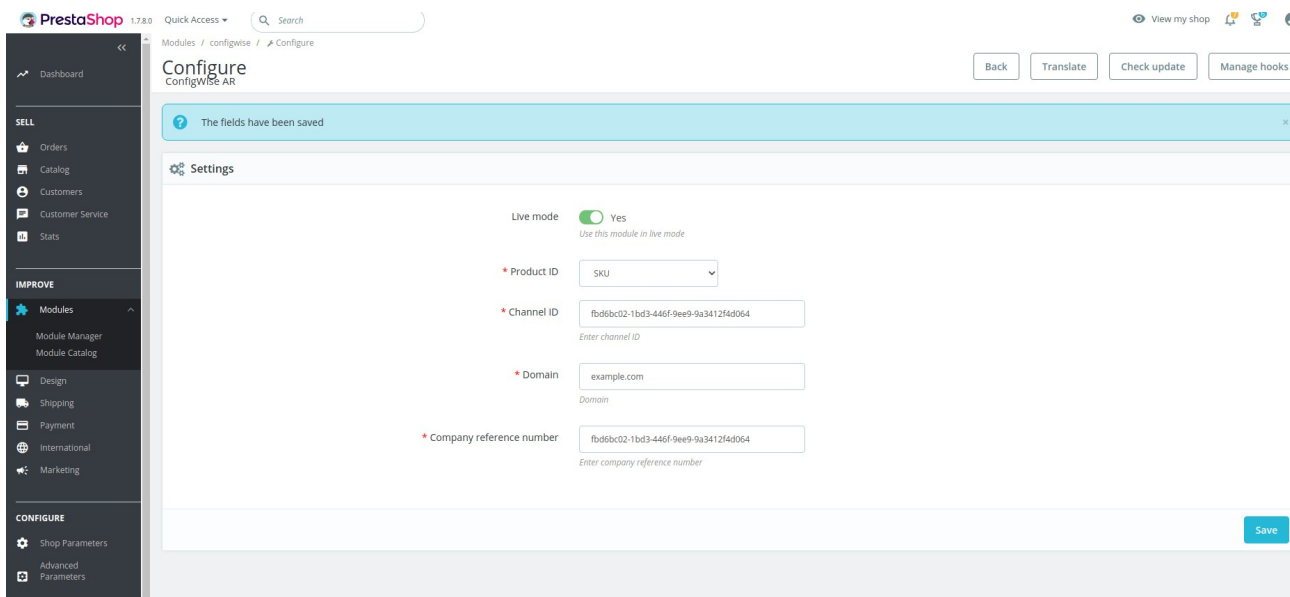

Click on select file link and select the downloaded module.

Installation will execute automatically and after then the module will be installed:

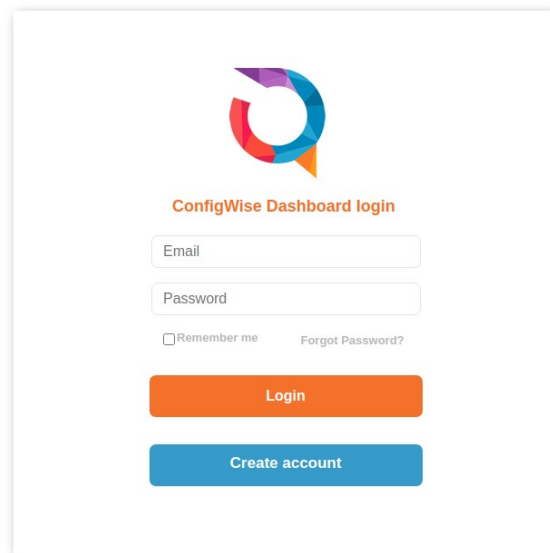

Click, please on the configure button and you will go to the named page.

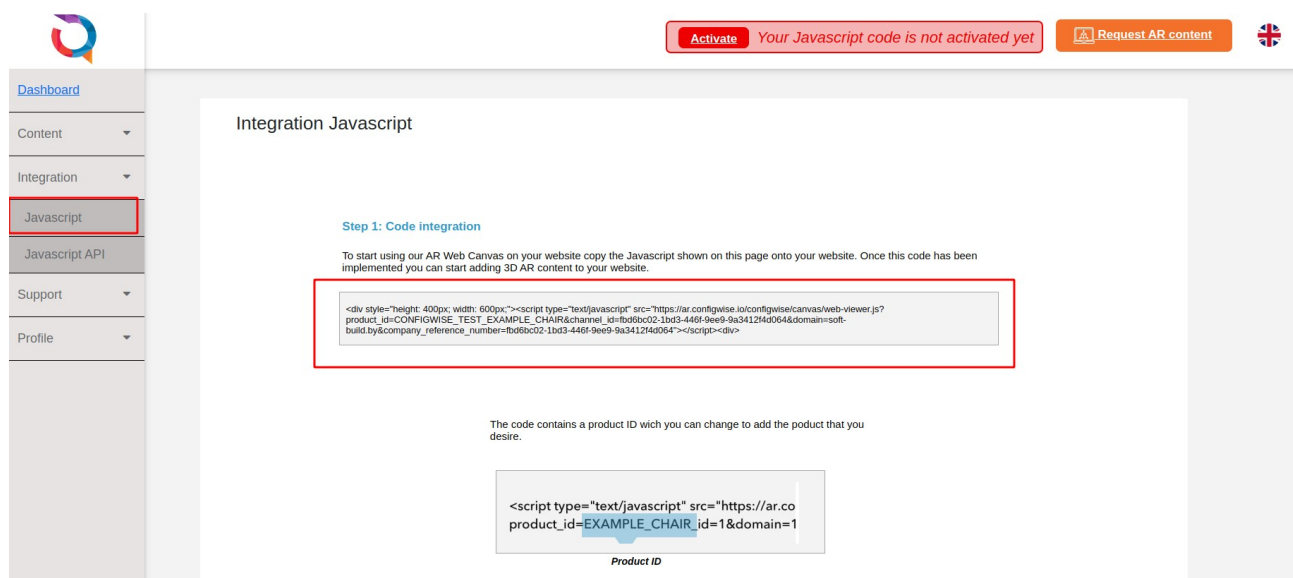

3. Configuration

After installation you will be able to configure the module, for it you will need to go to - <https://dashboard.configwise.io/> and login or create account, select that you need to do.

After success login or creating account you need to go to the page:

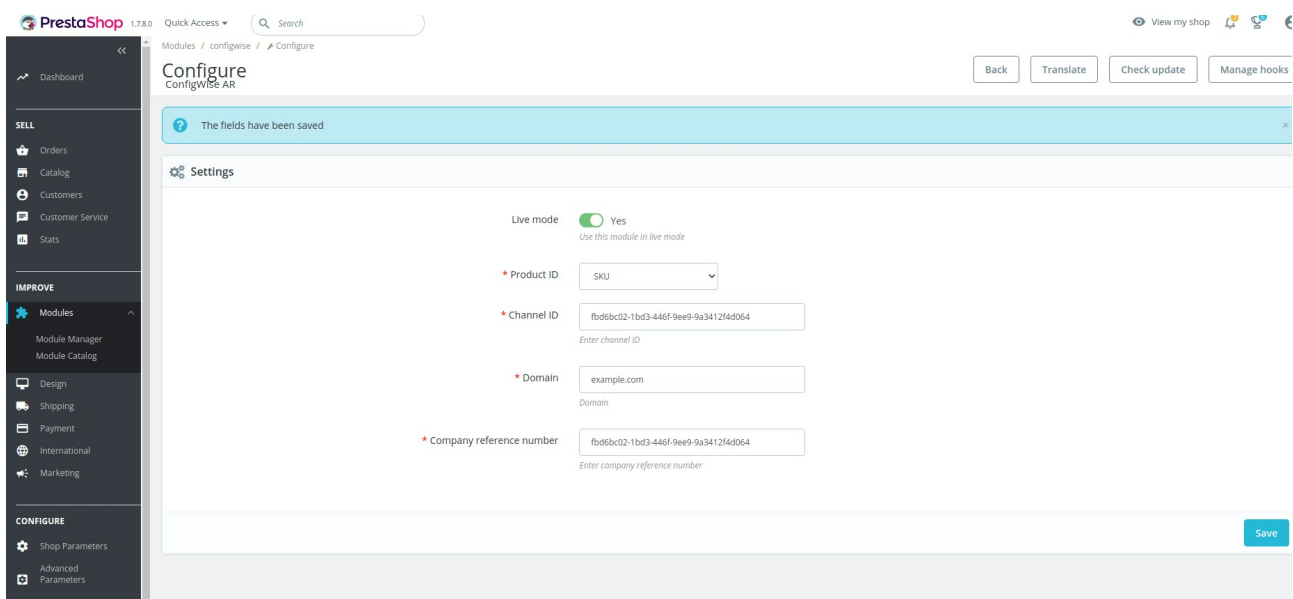

on the page you can see html code like:

```
<div style="height: 400px; width: 600px;">
<script type="text/javascript"
src="https://ar.configwise.io/configwise/canvas/web-viewer.js?
product_id=CONFIGWISE_TEST_EXAMPLE_CHAIR&channel_id=fbd6bc02-1bd3-446f-9ee9-9a3412f4d064&domain=example.com&company_reference_number=fbd6bc02-1bd3-446f-9ee9-9a3412f4d064"></script>
</div>
```

From the code you can select next values:

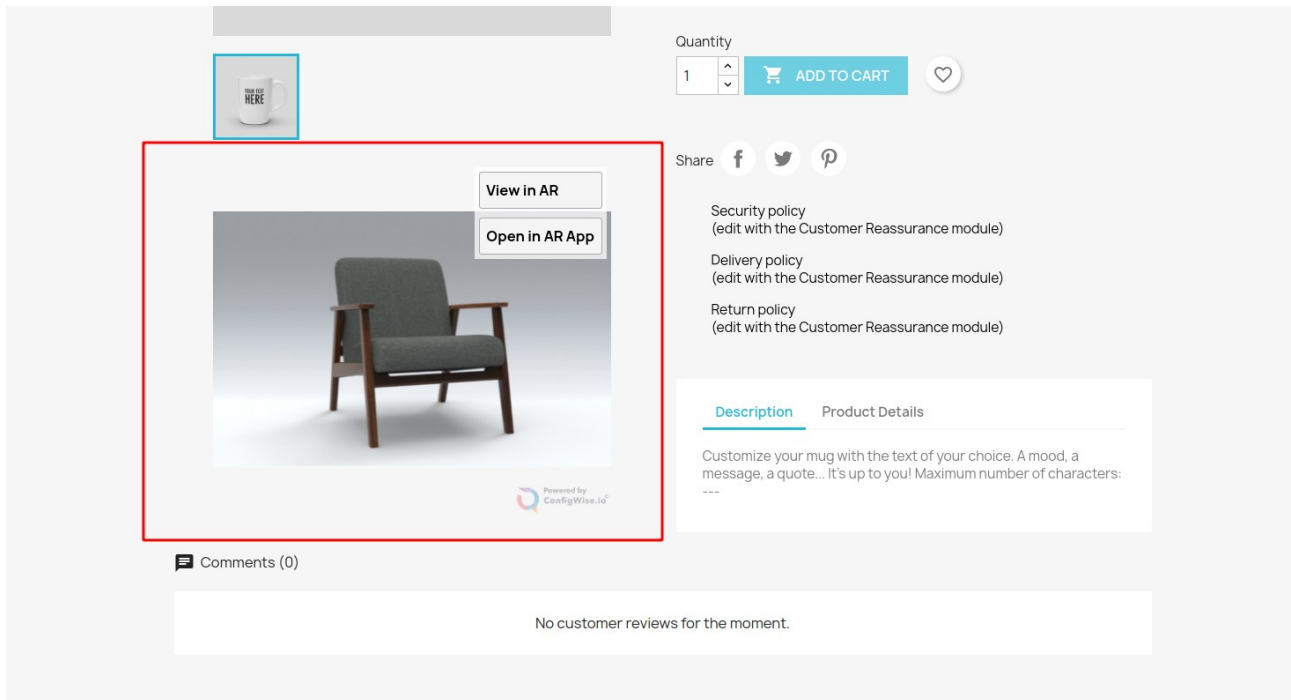

- channel_id=fbd6bc02-1bd3-446f-9ee9-9a3412f4d064
- domain=example.com
- company_reference_number=fbd6bc02-1bd3-446f-9ee9-9a3412f4d064

Installed PrestaShop module has the same named text fields, move the values to PrestaShop config form like on the screen, please:

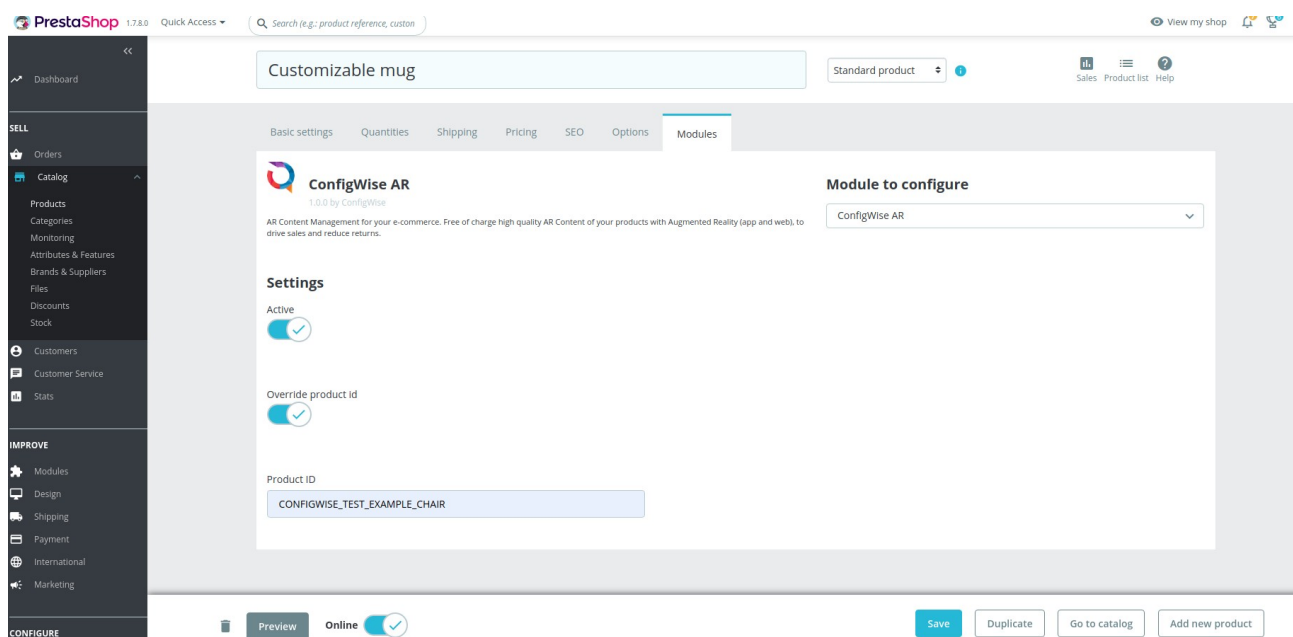

The screenshot shows the PrestaShop 1.7.8.0 configuration page for the 'ConfigWise AR' module. The interface includes a sidebar with navigation links for 'SELL' (Orders, Catalog, Customers, Customer Service, Stats) and 'IMPROVE' (Modules, Design, Shipping, Payment, International, Marketing). The main content area is titled 'Configure ConfigWise AR' and contains a 'Settings' section. A blue notification bar at the top states 'The fields have been saved'. The settings include a 'Live mode' toggle set to 'Yes', a 'Product ID' dropdown set to 'SKU', a 'Channel ID' text field containing 'fbd6bc02-1bd3-446f-9ee9-9a3412f4d064', a 'Domain' text field containing 'example.com', and a 'Company reference number' text field containing 'fbd6bc02-1bd3-446f-9ee9-9a3412f4d064'. A 'Save' button is located at the bottom right of the settings area.

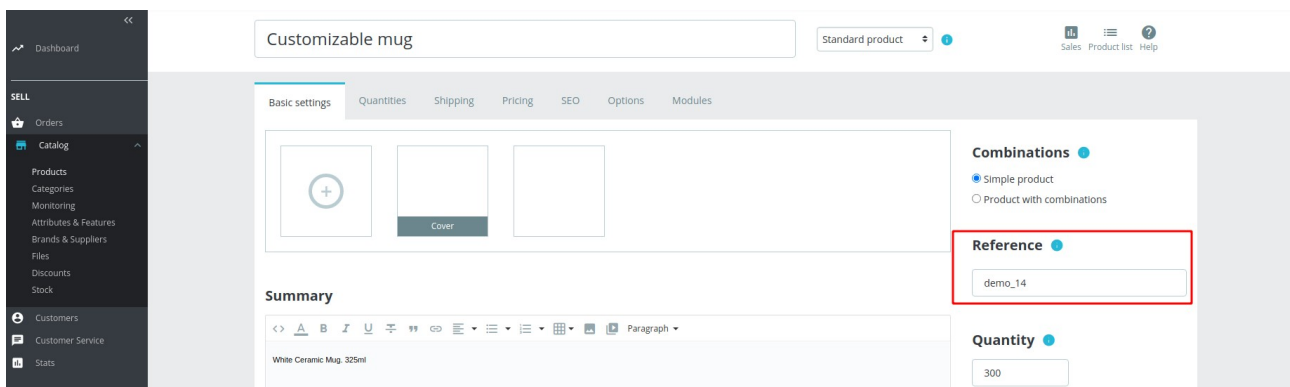

Switch of Live mode means that if select No on all product pages of your shop will show example of configwise ar widget like this:

Product ID fields means that selected attribute of a product will be used for identity the product in configwise system for displaying needed AR widget. The fields are global settings of the module but you can override or disable specific products using on a product page the setting form:

Switch of Active determine that on page of the product configwise AR widget will be show if select No widget of the product will not be displayed on a page. Switch of Override Product Id determines that for getting AR widget from congiwise system the module will use value from text filed Product ID on the page. If it will not be used the module will use next values:

Reference it is the same like SKU.

or Product ID like you select on the module config page in field Product ID select field.

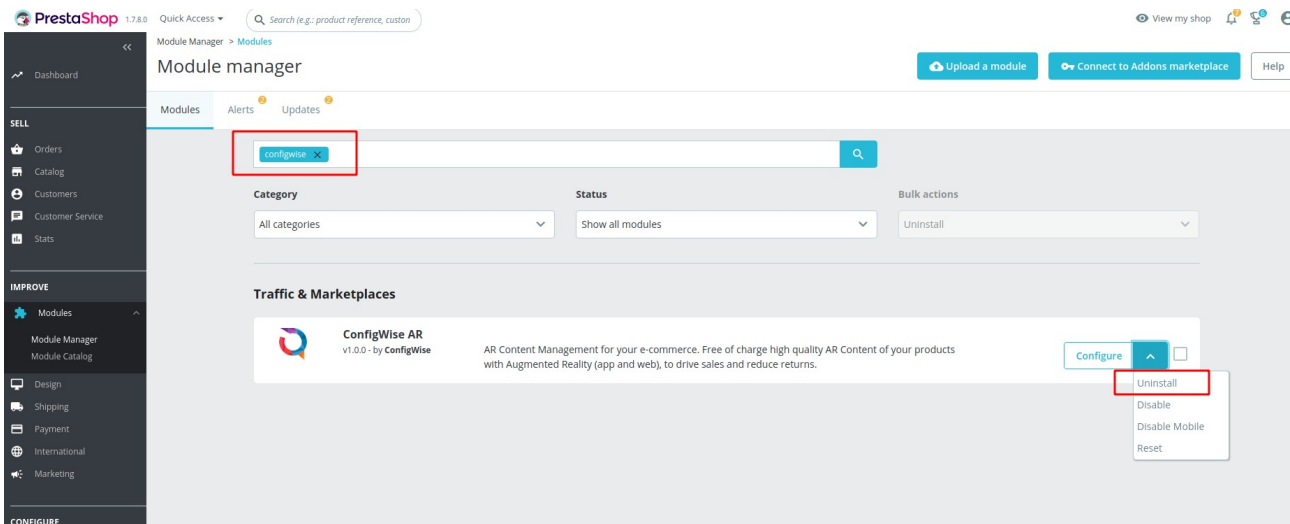

4. Using

After configure the module you will see on a product page the configwise AR widget that show you a QR code for mobile application.

5. Uninstallation

If you want to uninstall the module, you need to go to IMPROVE > Modules > Module Manager and search the module. After finding it, just select the Uninstall button like on the screenshot:

That's it. Thank You for using ConfigWise AR and more sales for you!

Best Regards,
ConfigWise Team.
